

Committee: Health, Sex and Life Education

Our Mission

Our mission is to cultivate among students an awareness of better health, both for the body and the mind and to help students to understand and appreciate the beauty of life.

Rationale

We believe that better health is essential and is the key to success in every aspect of life. We believe that an individual should have positive attitudes towards sex and life before he/she can plan for his/her own life.

Long-term Plan

1. To enrich and equip students with knowledge on health education and encourage them to bring the messages back to their homes and share with their family members.
2. To guide students to develop responsible attitudes and behaviour towards sex and safeguard their choices of life-style.
3. To encourage students to explore their potentials, to build up their self-esteem and confidence, and maintain a positive attitude towards life.
4. To build a healthy school environment.

Main Emphases in 2014/15

1. To broaden students' perspectives and heighten their social awareness.
2. To develop students' positive values and attitudes
3. To foster a healthy campus.
