

Committee: Information Technology

Our Mission

To provide the Right Technology at the Right Time for the Right Task.

With the rapid development in technology and associated pedagogies, we are keen to adjust our strategy to meet the changing needs of school, teachers and students to create an IT-rich environment for the enhancement of the learning outcomes within the school community.

Rationale

1. Students will be able to acquire knowledge in a fully computerized environment.
2. With the help of multi-media tools, ideas can be better communicated to students.
3. Staff can easily share their resources in a convenient way.

Long-term Plan

1. To provide a favourable environment and the essential tools for students to help them develop competencies in accessing, analyzing and applying information
2. To link up our students with the vast network world of knowledge and information to enable them to acquire a broad knowledge base and a global outlook.
3. To develop in our students the attitude and capability for independent life-long learning.
4. To provide a multi-media environment for teaching and learning in all classrooms.

Main Emphases in 2014/15

1. To improve the multi-media environment for teaching and learning in all classrooms and special rooms.
2. To promote the application of e-Learning resources to encourage student centered learning.
3. To promote the sense of responsibility on use of IT resources through IT Ambassadors.
