

Subject Department: Biology

Our Mission

To help students to appreciate the wonders of the living world and to stimulate their interest, eagerness, curiosity and self-initiative in the study of biology.

Rationale

We believe that learning becomes effective only when students think that it is meaningful and useful. Developing students' awareness of the interrelationship between biology and society enables them to apply their biological knowledge to their daily lives and solve everyday problems.

Long-term Plan

1. To develop effective teaching and learning strategies for students to learn interactively.
2. To inspire students to achieve their academic potential in studying biology.
3. To enhance student's learning effectiveness through cooperative learning.

Main Emphases in 2014/15

1. To develop effective teaching strategies through questioning and issue-based learning.
2. To consolidate student's learning through outside-classroom subject-related activities.
3. To implement collaborative lesson preparation and peer lesson observation to enhance teaching effectiveness.
