Subject Department: Computer

Our Mission
1. To strengthen the ability of students to use computer.
2. To develop the skills acquired to enhance students' creative thinking skill, critical thinking and communicative thinking in daily life.

Rationale
1. Through the use of IT facilities, in addition to the acquiring of knowledge of computer and information technology, we believe that students can be expected to build up positive values and self learning skills. With these foundations, students should learn how to learn and sustain life-long learning in the dramatic changing of IT.

Long-term Plan
1. To arise students' interest and curiosity in Information and Communication Technology by the exploring/ experiencing approach.
2. Students possess good computer ethics, including knowing the importance of the intellectual properties, copy rights, avoiding from computer crimes as well as using licensed software.
3. To train students to use IT in solving problems of daily life as well as an life-long tools.
4. To assist students in preparing the implementation of New Senior Secondary Computer Curriculum.

Main Emphases in 2014/15
1. To enhance questioning skills as effective pedagogies for teaching and learning.
2. To develop pull-out programmes for different students.
3. To promote learning by subject-related outside-classroom activities.
4. To support less able students.
