

Department: Mathematics

Our Mission

To help students acquire the ability to communicate, explore, conjecture, reason logically and solve problems using a variety of methods.

Rationale

Mathematics is a tool to help students enhance their understanding of the world.

Long-term Plan

1. To develop students' positive attitude towards mathematics learning and appreciation of mathematics.
2. To strengthen students' ability to manipulate numbers, symbols and other mathematical objects.
3. To train students to use mathematics to formulate and solve problems in daily life as well as in mathematical contexts and other disciplines.
4. To strengthen students' ability to communicate with others and express their views clearly and logically in mathematical language.

Main Emphases in 2013/2014

1. To enhance effective pedagogies.
2. To consolidate students' learning through various activities.
3. To arrange support programmes for high-achievers and less able students.
